

DATA 422 Final Presentation Rubric

Team Name:

Team Members:

Purpose: Evaluate a professional, stand-alone briefing that communicates the final project solution and provides decision-quality insights to the sponsor. Demonstrates mastery of coursework, independent research, and technical storytelling.

Category	A (Excellent)	B (Good)	C (Satisfactory)	D/F (Unsatisfactory)
Intro & Research Question	Clear, concise intro of sponsor and problem. Research question is well-defined and motivates the importance of the final solution.	Introduces required elements; framing or research question could be more focused.	Underdeveloped; research question is vague or importance not established.	Minimal intro; fails to define problem or provide context.
Methodology & Research	Synthesizes high-quality research. Effectively explains the integration of coursework tools with novel data science methodologies.	Solid research. Utilizes coursework tools; integration of novel methods could be clearer.	Limited research. Does not explore novel methodologies. Methods description lacks focus.	Minimal/no research. Incorrect use of tools. Section is incomplete.
Final Results & Solution	Prioritizes the final solution. Uses high-quality visuals/metrics to show impact. Alternative models only mentioned for brief context.	Clear results, but narrative spends too much time on the process/journey rather than the final output.	Superficial analysis. Narrative is distracted by failed attempts or lacks clarity on the final solution.	Minimal results. Fails to provide a clear analysis of the project's final output.
Conclusions & Recommendations	Provides decision-quality information. Actionable, data-driven recommendations that directly solve sponsor needs.	Conclusions present, but recommendations may lack specificity or clear actionability for the sponsor.	Vague conclusions; recommendations are generic or do not follow from the data.	No clear conclusions or actionable recommendations provided.
Communication & Professionalism	Stand-alone professional briefing. Cogent, formal, and visually excellent. All members contribute; handles technical Q&A with mastery.	Generally well-prepared. Mostly formal and accurate; some areas need improvement in clarity or visual storytelling.	Underdeveloped or unprofessional communication. Slides lack polish; handoffs or Q&A are awkward.	Poorly prepared. Lacks professionalism, coherence, or clarity. Fails to meet conference standards.
